SRM IST SRM | e-cell Algorand Club Synergy Club NIT Delhi

Personal Statement

I am an undergraduate computer science student focused on AI/ML engineering and full stack development, from fine-tuning models with PyTorch and LoRA / QLoRA to building secure, API-driven web platforms. Experienced in leading hackathon teams across front end, back end and UI/UX, with additional strengths in visual design. Core Member @ Algorand Club (Cybersecurity, Web3 and Blockchain) at SRM Ramapuram.

Skills

Languages	AI / ML	Web & Backend	Database
Python, C++, JavaScript, TypeScript, C#, SQL (PostgreSQL), HTML5, CSS3	PyTorch, torchvision, Hugging Face Transformers, PEFT (LoRA / QLoRA), scikit-learn, LLM Fine-Tuning, Computer Vision, Model Evaluation, Ollama	React (Vite), Node.js, Express.js, FastAPI, .NET, REST APIs, Tailwind CSS, Bootstrap, Material UI	PostgreSQL, Prisma, Redis, BullMQ

Security	Web3	Design	Tools
JWT and bcrypt Authentication, Helmet, Rate Limiting, Secure API Design	Blockchain and Web3 Fundamentals (Algorand)	Figma, Adobe Photoshop, Adobe Illustrator, Canva	Git/GitHub

Experiences

Intern — SRM | e-cell
SRM Institute of Science and Technology, Chennai Ramapuram — Chennai, Tamil Nadu, India

- Entrepreneurship Cell (E-Cell): contributed front-end and interface work to the official E-Cell portal for the student entrepreneurship community.

Leadership & Clubs

Core Member — Algorand Club
Algorand Club (Cybersecurity, Web3 and Blockchain), SRM Ramapuram — Chennai, Tamil Nadu, India

- Contributes to technical activities and events of the club.

Media Team — Synergy Club — 2025
Synergy Club — Chennai, Tamil Nadu, India

- Created event visuals using Photoshop, Illustrator and Canva.

Projects

1. G(AI)TWAY: GPU Orchestration and Model-Training Platform
PyTorch, Hugging Face PEFT, FastAPI, Express, TypeScript, PostgreSQL (Prisma), Redis (BullMQ)

- Built an end-to-end ML platform: a user picks a model and dataset, gets a GPU recommendation from a routing engine ranking hardware by VRAM fit, price, reliability and data locality, runs a real PyTorch training job, and deploys the result behind an API-key-protected endpoint.
- Fine-tuned MobileNetV3-Small and ResNet-18 image classifiers and implemented a LoRA / QLoRA pipeline for Llama 3 8B, evaluating models with accuracy, precision, recall, F1 and confusion matrices.

- Served trained checkpoints through a FastAPI inference service with measured latency and honest NVML/PyTorch hardware telemetry (labelling CPU fallback), and secured the backend with JWT, bcrypt, Helmet and rate limiting.

2. Udyog Setu: Financial Intelligence Platform for MSMEs

React (Vite), TypeScript, Tailwind CSS, Recharts / Chart.js, Figma

- Designed and built the MVP of a B2B platform that visualizes MSME financial health, including revenue trends, profit margins, compliance score, cash flow and operating expenses, to help businesses verify potential partners.
- Designed sector, location and profitability discovery filters, an investment watchlist and a supply-chain partner-matching flow, backed by a freemium-to-premium revenue model.

GitHub: github.com/Maddydm/UdyogSethu

3. Context: Application That Retains Context for AI

Developed an application that preserves context across interactions so AI assistants respond with continuity instead of starting from scratch in every session.

GitHub: github.com/Maddydm/Context

4. Inter-Institution Equipment Sharing Platform

HTML, CSS

Built a web platform where institutions and companies lend idle equipment to institutions that need it, with lending guided by policy purpose, request details and changing needs.

Hackathons

- Build with Bharat 4.0, NIT Delhi | Semi-finalist | National hackathon
- Inception World Hackathon 2, Bangalore | Among the top 20 teams | Won $300 in Claude credits
- Smart India Hackathon 2026 | Top 10 team, internal round
- Participant: Smart India Hackathon 2025, Hack with GDG Season 3, Acadflip Hackathon

Education

SRM Institute of Science and Technology, Ramapuram Campus, Chennai — 2025 – 2029 (Expected)

Bachelor of Technology, Computer Science and Engineering

Additional information

- **Maintaining a CGPA of 9.21/10 (after 2 semesters).**
- Led hackathon teams by splitting work across front end, back end and UI/UX, delivering working prototypes.
